

Dr Rich Mclean is a formerly celebrated nationally human rights awarded author and human rights advocate on the topic of holistic wellness and mental 'illness' after he wrote an autobiography bravely sharing his story about his difficulties. He was innocent and had not the breadth of vision to understand people may exploit his courage in order to attack him. Later in life he has been exploited in such a systemic and universal way the base libel and slander amplified existing prejudices within people and society. Scapegoated and vilified he attempted suicide. That's when the world revealed that to the world that threw him he's already gone; forsaken.

It's 25/07/2022 he needs our help.

He is a squatting vagrant via intelligent design, oppressed by the Government, can't go to cops, nor get a lawyer or be a whistleblower and categorically character assassinated with his already vocalised vulnerabilities amplified to echo in his life to an existential gridlock.

He's lost millions in detriment from being set up to fail again and again and framed at AHRC, AFCA, ComCare, Work Safe, The AAT bankrupt at ASIC and dozens of statutory authorities...

His former partner, Steve Iasonidis was a former ASIO employee and still owes him a legal just and equitable settlement for the relationship of five years in which they were engaged. Rich lived off a pension spending his nest egg, all the while Steve was on over 300k per year with shares, stocks, sold a million dollar house, and over a million in Telstra shares.

Rich has been nuclear character assassinated and is a scapegoat in Australian politics... that is underscored by his brave narrative of earlier in life, 'Recovered Not Cured a journey through schizophrenia' which contains bravely shared vulnerabilities that he is now exploited by.

The years long systemic abuse led him to a suicide attempt inside Weribee Mercy hospital in Feb 2021 for which the world victim blamed him then turned away.

Following the tragedy he was revived from certain death then dumped without a job, food, car, or insurances paid, work cover stopped, 2 x failed VOCAT cases, and he was squatting.

He had been traumatised to being ill and framed from a job he loved as a therapeutic support for the NDIS after completing a Doctorate.

Previously he had spoken publicly on recovery and holistic health at local state and federal / international levels. He worked in public roles as an illustrator for both The Herald Sun and The Age; who both had forsaken him.

Later in life his fiancé was an employee of ASIO and a cowardly enemy who has attacked Rich via proxy via Government agencies, and turned people against him.

When Dr McLean reverse engineered the movement to destroy him, he arrived at The Office of Prime Minister & Cabinet. They cited they needed more time at OAIC to complete his FOI, because his request was: 'voluminous' and 'complex'.

It was reviewed by the OAIC months later - and it was acknowledged officially by the OPMC that there were no

records whatsoever, or could not be found and and that he 'did not exist.

This allegorical threat of him not existing is what they want, and framed by a very recent incarceration dressed up as 'paranoid mental illness' when in fact it was the distress from an intelligently designed vagrancy.

This systemic abuse and neglect had driven him tragically to suicide inside a public hospital in Feb 2021 of which he was accidentally found with no pulse and revived from the 'fatal' injury cited in the FOI documents.

The Government DID forsake him after that, and he was left to an intelligently designed volatile desolate & desperate life. It was designed from all accounts with something in mind; to amplify his suffering and increase his misery

His former partner - still owing him the settlement - is silent, (apart from acting via proxy to incarcerate Rich), AFCA banned him from even having a complaint, after delaying and denying his valid determinations that were supposed to be settled in a month by AFCA's open policy.

Rich's took over a year and a half.

At the AHRC a million dollar conciliation was free kicked by Liz Lindsberg to the opposing party. Work safe Victoria referred him to Comcare as an NDIS provider and it took over a year for the head ComCare Paul Fowler to finally reject him.

A technicality of the SRC act was the reason — this man is a lawyer and a privileged political gatekeeper... also the old boss at work safe, and this is called corruption.

Rich wrote to the then attorney General about his failings in statutory organisations such as ComCare and AHRC and AFCA and The Ombudsman and then predicted he would fail at the AAT. The Governor General referred him patronisingly to SANE helpline. His book had been SANE Australia's 'Book of the Year' and he had worked for them and had been a face for SANE. The AG omitted interfering in exactly what it was:

A conspiracy to pervert the course of justice.

Also a vile victimisation of a person who worked for twenty five years helping others via altruism.

It would be predictable he may suicide living in abject poverty as far as research shows. His family and friends consciously witnessed this intelligently designed vagrancy and not a single person intercepted the many justice issues he was facing systemically from an intensely personal level/

This was not just a bad mental health system, but an endemic design in which he was scapegoated and systemically damned - and that he alone was left to fight for his own dignity and human worth on the precipice of existing.

The evidence in this email is extremely important, because it exposes a vile victimisation by the Australian Government - (which is against the law), and is fuelled by prejudice and stigma that Rich fought publicly for others for 25 years. It is

in defence of people with money who find incredibly easy to exploit an already vulnerable and victimised person.

This was the rendering of a movement that wanted to aid and abet Dr McLean's predictable suicide by creating the environment to foster desperation loneliness and hopeful self-inflicted violence of neglect.

IF HE KILLED HIMSELF it would relieve the guilt of a world forsaken him because the persecutors had no conscience.s It was a systemic and malicious universal oppression.

He is now seen as a burden to people in positions of political power & reputation, and sadly his family have forsaken him - even after he has achieved so much in life and been a spokesperson and put his heart on the line.

His dad?

'You've destroyed them' he says to Rich of his brother and sister whom he has not spoken to in a year and a half and they have changed numbers.

His sister?

On his birthday two years ago, she scolded him, 'You're a druggo and a schizo and get the fuck out of our lives', with the reference to 'our' meaning collectively as a family unit that included Rich parents and brother.

This is true exploitation.

It is true toxic family scapegoating.

True colours show in a crisis.

Peoples opinions of your worth to them shine a bitter blackness when you're down and out.

His millionaire uncle states 'YOU put yourself here in, mental illness, my lawyer says once you're in it your're fucked'

My brother spurts 'You got fucking problems' and additionally, in a way which never acknowledges the indifference the two have both experienced compared and contrasted in their worlds, (quote).

Mother dearest says of Rich's child sexual abuse, 'You probably caught him with a dirty magazine'. Following she quips about his fatal suicide in a way that tells him what he IS and ISNT over, 'You got over that'

Cousin Carolyn is base judgemental, 'I helped you and you deceived me and you're on ice and you've got schizophrenia'

This silencing of him protects those with two things: money and power, and a consciously organised nepotism that wealthy bureaucrats and Government employees have.

No one would ever cross the floor because they were paid by the Government as plump pawns to hush the whole thing, and tow the party line... It's too late for them to back track to simple exploitation because it literally killed him, they can't admit that.

Also it's way too late for Rich to return to his former unhurt self. He cannot place this intentional universal malice

somewhere neat and out of the way for the comfort of people who 'other' him as 'ill' quite readily for their relief of the guilty not sticking up for him.

Dr McLean was framed as an evil genius by Mr Russell Ball of Ball and Partners internally to Government agencies, constituting a microcosm of a conspiracy to pervert the course of justice. It was libel and slander Rich only discovered, after he had survived certain death inside a hospital for which there was not even an apology.

Dr McLean's brave and courageous public narrative of his person was now fuel for the movement to exploit him. Not only did Mr Ball frame him an extortionist, but others framed him as well.

He is an evil genius, a madman, a rapist, pedophile, dog f*&cker and worse. He hears the death threats on his front lawn and he hears the references to him outside and he hears the references that take advantage of the fact that for Rich the overlap of what is real and what is not. This 'faction' zone that exists between insane and insecure, that could be fiction or fact is enlarged for Rich.

Could be half real half unreal or half fact or half fiction, and this would be obviously confusing for Rich, who previously thought noting of sharing his private world publicly, because he was not consciously aware people would turn and exploit him utilising his vulnerabilities as ammunition.

Not only is Rich blessed and cursed with apophenia, in the way how allegory and symbols can provide a perspective allowing him to swim in the mystical whilst simultaneously drowning in the 'psychotic', but because nearby via any medium. The exploitative diatribe presented in a way

everyone knows are true are set up to be definitively experienced by Rich.

That way, via a process of an omission, the movement can identify prejudices they wish to frame him with anti is shared with other people. To have a theme placed across many popes opinions means that has to be quite a mid range type of information easily accessible and to understand.

This is a way which Rich is aware of what is real and what is not because the burdens directed at him in a real way to design him in prejudice via omission are the very base ones he has already expressed or are generalised prejudices already existing. Not the nuanced ideas contained in his PhD.

The financial ruin however of Dr Mclean was elaborately planned from long ago years in fact.

It set him up to fail again and again, with a malicious and conscious foresight, via proxy attacks of Government agencies and systemic organisations that robbed him of his dignity and his prosperity.

It desecrated his human value, his dignity, and his worth as a human being. He's had to beg for food, and was rejected healthcare rejected from Dr's and changed his name in a bid to see an authentic GP.

Dr McLean knew he was trapped in narcissistic abuse and neglect so thorough in its gaslighting - that he questioned the validity of his life.

www.killhim.info - was launched to publicly expose the horror of his existence of being victimised by what seemed an entire country rendering him an innocuous vagrant in a society that has rejected his democratic whistleblower protections.

He added to it - as the vile victimisation onion layer by onion layer, saturated Australian politics and further not just innocuously or via ignoring him, but an active conscious malice that was set to destroy him, his value his worth - everything he worked his life for.

Every single Government public official who is bound to act within the remit of the Charter of Human Rights for people with a disability, ratified by the Government in 2008, did not act within that remit.

No one spoke.

So, without a soul in the world to back me, I spoke for myself. I followed protocol in the most profoundly gullible of ways, holding hope of traction for justice, yet as it had always been - I was set up to fail, ahead of time, every time.

Currently as of 25/07/2022:

Has no human value

No worth

No dignity

Is exploited

Is arbitrarily denied life
Is being systemically tortured
Government force medicated for 'delusions'
Had his property withheld from him
His human rights in shattered pieces
His access to the law destroyed
His agency to engage litigation irrevocably removed
His voice silenced

He is me, Dr Rich Mclean.

I am squatting
I don't have enough food
I am malnourished over 18 months
I barely have healthcare
I've lost every person in my life
I've barely a friend
I've suffered police brutality
Systemic violence set upon a hospital too
Systemic torture

Denied value

Dignity

Worth

Further oppression

Catastrophically character assassinated

An abhorrent vile victimisation - a scapegoat.

The world has indeed first in a somewhat biblical way allegorically crucified me, then I survived only to suffer another 'death' of my people, further ostracisation and neglect and damned reputation so watertight that I had to beg people to object to my own suicide that was deemed 'fatal' inside a public hospital.

I've not ever seen evidence of so much as a pen being lifted in the defence of my life or indeed the accidental discovery of me in which mental illness and drugs would be blamed, yet seeing I was 'saved' everyone has moved on and intentionally hurt me.

After that I suffered the malicious design of financial emotional and repetitional detriment again as a squatting vagrant only now with a probable acquired brain injury.

The Government is well aware of my difficulty - they helped design it - and now they have consciously witnessed me live on a DSP of \$1400 a month when my rent is \$1646 per month. For a year and a half since I was saved from certain death, the world has observed struggle and barely a person has intervened. I have been forsaken.

I am now an infamous vagrant people love to hate An
innocuous voiceless refugee and political prisoner - trapped
a financial refugee and denied whistleblower rights in a
democracy.

I have been forsaken.
